OUR GUARANTEE AND POLICY CONCERNING REPLACEMENTS

WE GUARANTEE OUR MERCANDISE TO BE IN GOOD CONDITION when sold and to commence growing if given proper care. If any fail to start growing after being properly planted and cared for, we will allow the purchase price as credit on replacement.

Any request for replacement shall be accompanied with the paid sales receipt.

FLOWERING AND SHADE TREES

Flowering and shade trees are really the backbone of a well planned garden. Trees planted in the parking strip cut down the glare and heat from the street and deaden traffic noises. Trees provide ideal background for shrubs and other plants; provide shade for the garden living areas. The flowering trees produce a display of color unequalled by any other class of plants. At our nursery you will find flowering and shade trees to suit almost any purpose. We will be happy to advise you as to the best kinds to suit your particular requirements.

BIRCH

A group or row or even a single specimen of Birch adds a graceful note to any landscape. The foliage is a pleasing green in summer, golden in the fall. In the winter the tracery of the graceful branches and the black-etched white bark form a very pleasing picture.

European White Birch. Everyone knows the White Birch with its beautiful white bark and black markings. Light green foliage. Rapid growth. Very attractive.

5-6' \$2.95, 6-8' \$3.95

Cutleaf Weeping Birch. Plant in groups or clumps. When sunlight filters through, it makes a beautiful display. Branches weeping and leaves deeply cut. Otherwise like the European White Birch.

5-6' \$3.95, 6-8' \$4.95

FLOWERING CHERRY

The extremely beautiful flowering cherries thrive in our climate and no gardener should pass up the chance to have one or more of these lovely trees in his yard. 5-6' branched \$4.95, 6-8' with 2-yr. top \$6.45. Other sizes available.

Mt. Fuji. Large double snow white flowers in pendant clusters. Rather spreading habit. A breathtaking sight when in full bloom.

Kwanzan. The large double pink flowers literally wreath the branches. One of the most spectacular cherries we have. Of rather upright growth.

Prunus Autumnalis. Small tree with semi-weeping branches. Covered in late winter and early spring with pinkish flowers.

WEEPING FLOWERING CHERRY

These well known trees carry their bright pink blooms on pendulous branches that reach to the ground. A very popular yard tree. Available in single flowered and double flowered form.

2-yr. No. 1 \$6.50

BOX ELDER

Silver Variegated. A slow growing broad headed tree with pale yellow foliage splashed with green. A striking tree well adapted to planting as a lawn specimen. 5-6' with 2-yr. top \$3.95, 6-8' \$4.95

FLOWERING PLUM

Prunus blireiana. Brilliant red foliage which turns bronze later in the season. Masses of double soft pink flowers line the stem in spring. A very popular tree which supplies its full share of color to the spring landscape.

Thundercloud. Clouds of pink blooms early in spring followed by rich red leaves which deepen to rich purple as the season advances.

5-6' \$3.95, 6-8' \$4.95

GOLDENCHAIN TREE

Laburnum vossi. This grafted variety is exceptionally showy when in bloom—much superior to the common sort. Long racemes of golden yellow pea-shaped blossoms are suspended from branches covered with clover-like foliage.

6-8' \$4.95, 8-10' \$5.95

FLOWERING CRABS

5-6' branched \$3.95, 6-8' with 2-yr. top \$5.95. Other sizes available.

Among the finest of all ornamental trees. In the spring the trees become a solid mass of bloom ranging in color, according to the variety, from white or delicate pink to glowing carmine. Because they remain small they are ideal for planting on the terrace.

Almey. The glistening fiery crimson blossoms as large as silver dollars crowd the branches to the tips. ALMEY takes its place as one of the most beautiful flowering crabs in America. From a distance the tree looks like a "mass of flame." The fruits are small, oval, maroon, and hang on into the winter season.

Eleyii Crab. A bronzy foliaged crab with deep rose flowers and dark red fruit.

Floribunda Crab. Small round-headed tree. The gracefully arching branches are densely wreathed with masses of pink buds and white flowers in spring.

Hopa Crab. Rosy red flowers. Red fruits in fall.

Neidzwetskyana (Redvein Crab). Flowers, fruit and foliage are all of a purplish-red hue.

Red Silver Crab. Attractive reddish or purplish-bronze foliage with slightly drooping branches.

HAWTHORN

Paul's Scarlet Hawthorn. Masses of double carmine red flowers in spring. An excellent tree for small gardens and parking strips. White and pink available.

5-6' 2-yr. top \$3.95, 6-8' 2-yr. top \$4.95

DOGWOOD

Florida rubra. The pink flowering form. A really spectacular tree that never fails to draw admiration.

Balled 2-3' \$7.95, 3-4' \$9.00

Pacific Dogwood. The special glory of the Northwest woodlands. Graceful tree covered with huge creamy "blossoms" in spring and occasionally bearing a liberal sprinkling of blooms in the fall.

4-5' \$4.95, 5-6' \$5.95

MAGNOLIA

Magnolia soulangeana. Masses of big lily-like blooms before the leaves appear in spring. Purplish outside, pale lavender or white inside.

2-3' \$7.95, 3-4' \$9.95

Magnolia rustica rubra. This variety has deep pink flowers. Vigorous growth.

2-3' \$7.95, 3-4' \$9.95

Magnolia grandiflora. Large evergreen tree with neat glossy foliage. The huge white fragrant water-lily-like flowers, often a foot in diameter, appear throughout the summer.

2-3' \$4.95, 3-4' \$6.95

Magnolia stellata, Star Magnolia. Neat growing small tree or large shrub. Myriads of many-petaled white flowers 3 to 4 inches across in spring. Very choice. Pink forms available.

12-15" \$4.95, 15-18" \$5.95

PAUL'S
SCARLET
HAWTHORN

FLOWERING
CRABAPPLE

WEEPING CHERRY

flowering trees

ELM

Chinese Elm. Very rapid growing, extremely hardy tree. Tolerant of most adverse soil and water conditions. Holds leaves until very late in fall.
6-8' \$3.45, 8-10' \$4.95

MAPLE

Silver Maple. Very rapid growing large shade tree. The under side of the leaves are a silvery white, hence the name Silver Maple. Turns golden yellow in the fall.
6-8' branched \$3.50, 8-10' \$4.95

Norway Maple, Crimson King (Plant Pat. 735). A striking form of Norway Maple with the leaves a crimson color throughout the summer months. The stock of this much talked of tree is very small so we suggest ordering early.
5-6' \$7.95, 6-8' branched \$10.95

Faassens Black. A gorgeous red or maroon leafed Norway Maple which we introduced from Holland. It holds its deep maroon color all through the season, creating a striking contrast when planted with other trees.
5-6' \$7.95, 6-8' \$10.95

DWARF MAPLES

Laceleaf. A beautiful small shrub with deeply dissected fern-like leaves of deep red.
9-12" \$4.95, 12-18" \$6.95

Red Leaf. A deciduous variety that is slow growing. The small red leaves are deeply cut and sawtoothed. Can be used very effectively on north and east walls and in patios.
12-18" \$4.50, 18-24" \$5.50

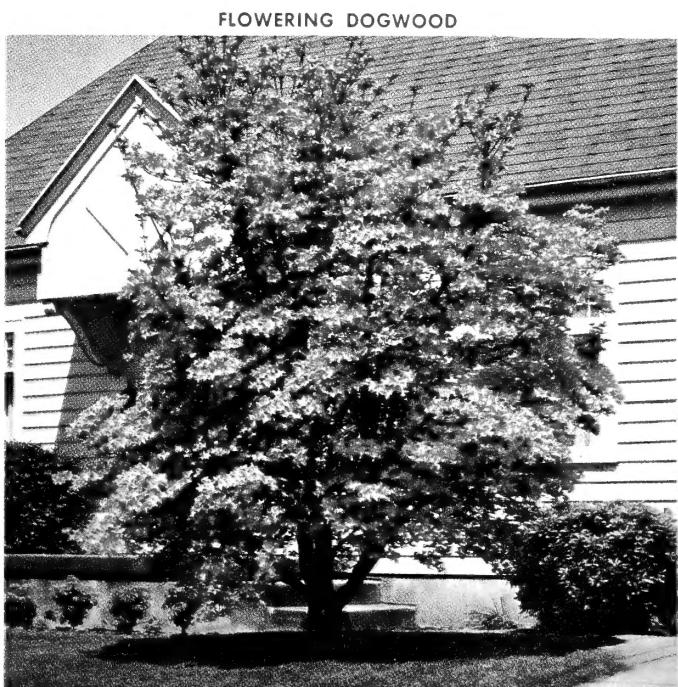

OAK

Quercus palustris, Pin Oak. Very fine street tree, tall with gracefully drooping branches. Deeply lobed, pointed foliage.

Quercus rubra, Red Oak. An excellent tree of rapid growth. Foliage turns russet and copper in autumn.
5-6' branched \$5.50, 6-8' \$6.95

POPLAR

Lombardy. Erect growing tree; dark glossy green foliage. Forms a striking shaft when large. Ideal for accent and windbreaks. 75 feet.
6-8' \$2.95, 8-10' \$3.95

FLOWERING DOGWOOD

...shade trees

SWEET GUM

Liquidambar styraciflua. Slow growing tree useful in parkway plantings or as lawn specimens. Clean neat growth. Glorious in the fall when arrayed in its autumnal orange, gold and red.

4-5' balled \$5.95, 5-6' \$6.95

SYCAMORE

Sycamore or Plane Tree. Handsome symmetrical shade tree. Foliage dense, light green, maple-like. Interesting greenish white mottled bark.

6-8' \$4.95, 8-10' \$5.95

TULIP TREE

Liriodendron tulipifera. A tall growing symmetrical tree. The cup shaped blooms are pale chartreuse.

4-5' \$3.95, 5-6' \$4.95

NOTE: Not to be confused with Magnolia which is also sometimes called Tulip Tree.

WEEPING WILLOW

Golden Weeping Willow. Golden bark, graceful weeping habit.

6-8' \$3.95, 8-10' \$4.95

CHINESE ELM

SYCAMORE

RED MAPLE

SILVER
MAPLE

Plant VINES for Shade, Screening and Bloom

Vines add the finishing, softening, home-like touch to a house or garden. Use them to soften building lines, to shade a patio area, or employ the more rampant growers to screen out an unwanted view. They give personality to a garden—make it look lived in.

2-yr. No. 1 plants \$1.50 each, except as noted.

CLEMATIS

Clematis are dainty deciduous climbers prized for their lovely wide open blooms. Their colors span many shades from light blue to deep maroon.

1-yr. plants \$1.50

2-yr. plants in containers \$2.50 to \$3.50

Clematis armandi. An evergreen native of China with many white flowers in spring and vigorously climbing leathery foliage. Must have relatively frost free location.

Clematis jackmanni. Purple. Attaining the height of 10 feet, it is a rapid climber and blossoms freely.

Clematis Henryi. Creamy white. The large white flowers and intense green foliage present a striking appearance. Blooms in early, and again in late, summer.

Clematis Mme. Edouard Andre. Red. Grows to a height of 8 feet. It is a free and persistent producer of crimson flowers from July to September.

Clematis montana rubens. Rapid growing, early blooming, with rosy flowers 1 to 2 inches across. Color changes to light clear pink as the flowers expand.

CLEMATIS RAMONA

Clematis Nelly Moser. Mauve with red bars.

Clematis Ramona. Light blue. Grows from 8 to 10 feet. The blossoms appear in July and last for several weeks. Its clear sky blue flowers give it a charm all of its own.

HONEYSUCKLE

Lonicera belgica, Belgian Honeysuckle. Vigorous vine useful for its evergreen foliage and soil binding roots as a ground cover or on fences.

Lonicera heckrottii, Goldflame. Large clusters of brilliant pink and yellow fragrant flowers from spring until fall. Can be sheared into hedge form or grown as a vine or naturally shaped shrub.

IVY

Boston Ivy. Small leaves set close together changing to rich crimson in fall. Makes an excellent cover which adheres to masonry walls.

English Ivy. Evergreen vine with leathery, glossy leaves adapted to a wide variety of uses.

JASMINE

JASMINE

Winter jasmine, Jasminum nudiflorum. Fragrant yellow flowers throughout the winter set off by the bright green stems. **White Jasmine, Jasminum officinalis.** Ferny foliage and white flowers throughout the summer. Fragrant.

SILVER LACE VINE

Polygonum auberti. A rapid growing deciduous vine. Supplies panicles of fragrant flowers in late summer. Will cover a large area in a short time. Sun or part shade.

WISTERIA

Deciduous vine well known in all parts of the country for the long hanging clusters of pea shaped flowers of delicate coloring and exquisite fragrance. Makes a vigorous tracery of stems on arbors and in spring, before the leaves appear, a sudden burst of color. Available in Purple, White and Pink.

2-yr. \$2.50

FATSHEDERA

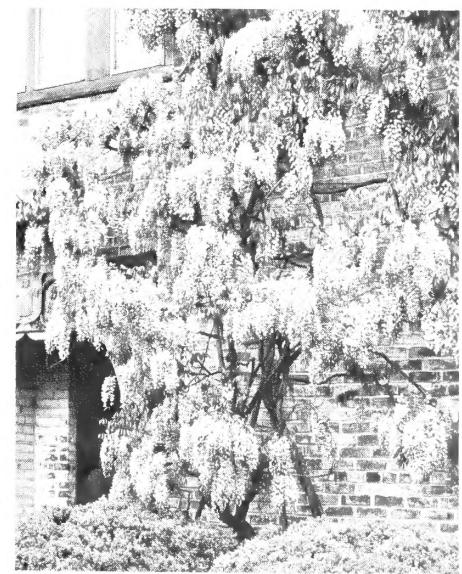

Lizei. Large dark green highly polished leaves.

BOSTON IVY

CLEMATIS MONTANA RUBENS

WISTERIA

The uses of vines are almost unlimited, and they are readily adaptable to many different situations. Wisterias can be trained to conform to various types of supports doorways, arches, pillars, trellises, arbors, even tree trunks, and should be pruned back to rather heavy wood each year for the finest effect. Many uses for Clematis will readily suggest themselves. They are specially desirable because of the long season of bloom that can be had by cutting back the vines after the first blooming period. Vines primarily grown for foliage effect can be very effective when two or more varieties are used on one wall. This gives a pleasing diversity of color and texture.

WHAT AND WHERE TO PLANT

SHRUBS—VINES—CONIFERS—GROUND COVERS

To help you in selecting the proper shrubs and vines for your new home, or for replacing existing plantings that have outgrown their usefulness, we have compiled the following list of plant material. If you find varieties listed with which you are not familiar, we suggest you read carefully their descriptions (refer to index for page on which they will be found).

Practically all plants listed for sun will prove satisfactory if given half a day of sun and material for shade will generally tolerate morning and late afternoon sun.

Heights as indicated are necessarily approximate. See description.

Some varieties suitable for both sun and shade, as noted.

PLANTS FOR SUN	PLANTS FOR SHADY PLACES	FLOWERING SHRUBS	INFORMAL (UNTRIMMED) HEDGES	FORMAL TRIMMED HEDGES

BROADLEAF evergreens

DAPHNE

PHOTINIA

OREGON GRAPE

Most of the shrubs used in planting about the house in the Pacific Northwest are found in this group. They are of year 'round good appearance. Most of them are desirable for their foliage alone and display interesting and often very showy flowers. Some are more useful for their foliage effect. They offer, as a group, subjects for all purposes: foundation plantings, screens, hedges and some are large enough for planting as small trees. Included in the kinds we offer are many varieties which make a cheerful display of berries in the fall and winter. Some are adapted for growing in shady situations while others will thrive in the sunniest spots. We will be glad to suggest suitable kinds to fill your special needs.

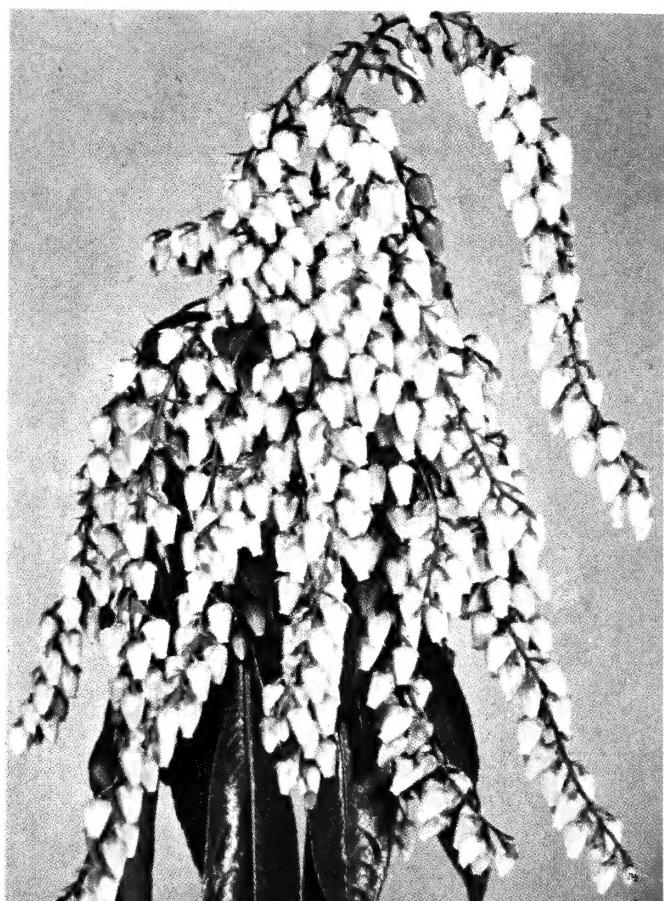

ABELIA

Abelia Grandiflora. Graceful evergreen shrub with arching branches, bronzy foliage and dainty, fragrant white bells in spring and early summer. Sun or light shade. Very hardy.

Adelia Edw. Goucher. Pinkish lavender bells in summer. One of the best of the newer shrubs. Excellent foliage, compact habit of growth. Hardy.
12-15" \$2.95, 18-24" \$3.50

ANDROMEDA

Andromeda japonica. Lily of the Valley Shrub. Low evergreen bush to 4 feet high. The leaves are bronzy pink when young, turning to medium green as the leaves mature. Pendant clusters of white Lily-of-the-Valley-like flowers in early spring.
12-15" \$3.95, 15-18" \$4.95

ANDROMEDA

BROADLEAF EVERGREEN FLOWERING SHRUBS

AUCUBA

Aucuba japonica variegata. Gold Dust Plant. An excellent shrub for shaded places. The large glossy pointed leaves are spotted or speckled with gold. Bright red berries in fall provided pollenizer is planted nearby. Will grow in the deepest shade.

Aucuba japonica, Green. Like the above but with entirely green leaves. Bright red berries in fall. Requires a pollenizer.

Pollenizer. Does not have berries but necessary to pollinate the above varieties. Attractive foliage.
12-15" \$2.95, 15-18" \$3.95

AUCUBA

COTONEASTER

Very useful group of shrubs with white flowers and pretty red berries that lend attractive color to the garden. Many have distinctive growing habits which adapt them nicely to rock gardens, bank plantings or in front of other shrubs, but especially among rocks. The taller kinds make good all around ornamental shrubs.

Cotoneaster horizontalis. Densely twiggy, nearly horizontal habit, heavily studded with red berries in the fall and winter. Semi-evergreen, the leaves turn red and orange at frost time. Excellent for steep banks, walls.

Cotoneaster microphylla. A vigorous procumbent, spreading shrub with small dark green leaves and rosy crimson berries in fall and winter. Adapted to dry banks and poor soil.
12-15" \$2.95, 15-18" \$3.50

Cotoneaster parneyi. Very showy variety with handsome berries, largest of all, in immense clusters. Large glossy leaves.
15-18" \$2.95, 18-24" \$3.95

COTONEASTER

DAPHNE

Daphne odora. Dense low shrub with rich green leaves, often margined cream, and clusters of exquisitely fragrant waxy white or pink flowers in late winter and early spring. At its best in lightly shaded situations.
9-12" \$2.95, 15-18" \$4.45

Daphne cneorum. Rock Daphne. Very low shrub with fine leaves and numerous clusters of very fragrant bright pink flowers in early spring. One of the showiest and choicest of the smaller shrubs. Ideal for rock gardens.
6-9" \$2.45, 9-12" \$3.45

PYRACANTHA

SMALLER SIZES AND SPECIMEN PLANTS AVAILABLE AT OUR NURSERY

FIRETHORN (*Pyracantha*)

These are strong growing shrubs with erect or spreading branches and narrow dark green leaves and clusters of white flowers in spring. The real glory of these shrubs is the colorful abundance of berries in fall and winter. There are a number of excellent varieties available: **Lalandi**, **Rosedale's**, **Duvali**, and **Government Red**.

15-18" \$2.95, 2-3' \$3.95, Specimen \$5.95 up

HEATHER

Heathers are among the most desirable of the low growing shrubs for Pacific Northwest Gardens. A proper selection will give you blooms almost the year around. The double forms of Scotch Heather bloom in the summer and are choice for cut flowers. The **Irish Bell Heather** also blooms in summer; both purple and white kinds are available. The various forms of **Erica vagans**, the Cornish Heath, produce their brilliant flowers in late summer and should not be overlooked. For winter and early spring blooms we recommend **Erica carnea** in one or more of the pink forms, planted in combination with **Springwood White**. We usually have a number of the better kinds on hand.

Heathers are especially recommended for planting in moist ground in sunny situations where they will thrive with little care and produce blooms in greatest profusion. Also they are ideal for planting under windows where their low habit and cherry bloom are always pleasing. Use them for bank covering or plant in drifts.

Erica Maxwell. Dwarf growing; blooms in August; red flowers.

Erica Mediterranean Hybrid. Vigorous but compact fine leaved shrub with masses of pink flowers all through the winter and into spring.
6-8" \$1.25, 8-10" \$1.95

ERICA CARNEA

KALMIA

Kalmia latifolia. Mountain Laurel. A shrub of moderate growing habit, which bears clusters of pink blooms like inverted umbrellas in mid-spring. The foliage is attractive the year around. Does best in light shade. An altogether choice and desirable shrub.
9-12" \$2.95, 12-15" \$3.95

MEXICAN ORANGE

Choisya ternata. Bright green three-parted foliage on neat rounded shrub of good proportions. Grows readily in sun or shade. Clusters of fragrant white flowers in spring.
9-12" \$2.45, 12-15" \$2.95

LAUREL

Prunus Zabeliana. A new and valuable broadleaved shrub. A moderate growth with wide spread, but can be held low by removing the branches that grow upward. The leaves are only half the width of English Laurel.
12-15" \$2.95, 15-18" \$3.95

LAURESTINUS

Viburnum Tinus, Laurestinus. A rounded shrub with deep green oval leaves and a great profusion of flat clusters of white flowers in early spring. The pink cast of the unopened buds lend another note of color. A vigorous growing shrub.
9-12" \$2.95

OREGON GRAPE

Mahonia aquifolium. Beautiful, low-growing evergreen shrub; dark green leaves, tinted red in winter. Flowers bright yellow, deep blue berries.
12-15" \$2.95, 15-18" \$3.95

OSMANTHUS

Osmanthus Delavayi. Shrubby osmanthus, making a graceful shrub covered with small oval or rounded leaves of deep green. Spring brings forth clusters of fragrant white flowers.
9-12" \$3.95, 15-18" \$4.95

PHOTINIA

Photinia Serrulata, Chinese Photinia. Large, broad toothed leaves which often assume pretty red or bronze tints, especially when young or during cold weather. Large flat clusters of white flowers in April and May followed by red berries.
18-24" \$3.95, 24-30" \$4.95

SARCOCOCCA

Sarcococca Ruscifolia. Medium size shrub (4 feet), attractive dark green shiny rounded leaves. Useful in partially shaded places as foliage shrub, the beauty of which is augmented by fragrant white blossoms and dark scarlet berries.
6-8" \$2.95, 8-10" \$3.45

SKIMMIA

Skimmia japonica. Useful low shrub for shade with attractive foliage. White star shaped flowers followed by clusters of large bright red berries. Requires a pollinator.
9-12" \$3.95, 12-15" \$4.95

STRANSVAESIA

Spreading shrub. The new leaves are bronzy, maturing to a soft green. Flowers white, followed by red berries in clusters, giving color throughout the winter.
15-18" \$2.95, 18-24" \$3.95

SARCOCOCCA

VIBURNUM

Viburnum burkwoodi. The glory of this shrub is its clusters of pink and white fragrant flowers in earliest spring. Almost evergreen, although it will drop some of its foliage in cold weather.
15-18" \$3.45, 18-24" \$3.95

Viburnum davidii. A very handsome evergreen of low growth with unusually distinctive dark green ribbed leaves. Attractive pinkish-white flowers in summer. Thrives in sun or light shade. Plant at the terrace edge, along walks, by doorways.
6-8" \$2.95, 10-12" \$4.45

VERONICA

Veronica Autumn Glory. Low tidy plant with cone shaped clusters of bright lavender-blue flowers in summer. Will bloom until frost if the spent flowers are pruned off.
9-12" \$1.95

SKIMMIA

HEDGE PLANTS

for attractive
living fences

Priced per each in lots of 10 or more

Boxwood Truetree. Grows to 4 feet. Small dark green leaves. 9-12" 95c, 15-18" \$1.45

Boxwood Truedwarf. Low growing box suitable for low hedges and edgings. 4-5" 75c, 8-10" \$1.45

Cotoneaster Franchetti. 18-24" \$2.95

English Laurel. Evergreen hedge plant. Large glossy green leaves. Robust grower. 9-12" 45c, 18-24" \$1.25

English Privet. An old standby for hedges. Dense twiggy growth and somewhat smaller leaves than the California Privet. 18-24" 25c, 24-30" 30c

Floribunda roses for a beautiful effect. See rose listing, page 23.

Pyramid Arborvitae. 24-30" \$3.50

There are several other types of coniferous and broadleaf evergreens suitable for hedges.

PYRAMID ARBORVITAE

GROUND COVERS

Ajuga. Excellent for all areas. Has beautiful green foliage and blue flowers in early summer. \$4.95 per flat

Cotoneaster humifusa dammeri. Flat, evergreen, hardy and vigorous shrub. Will grow in sun or shade, moist or dry soil. 2" pots 50c

Heathers. For description see p. 9.

Evergreen Azaleas. See page 15.

Pacysandra. Hardy perennial herb with clean, crisp evergreen foliage. 25c per division

Deciduous Flowering Shrubs . . .

18-24" \$1.50, 2-3' \$2.50, except as noted.

This group of shrubs contains many of the indispensable favorites such as Lilac, Forsythia (Golden Bells), and Spiraea. Every garden should contain at least a few of these popular beauties. They will contrast effectively with the evergreens and contribute their special touch of grace and beauty to the borders of a well planned garden.

Many Other Varieties Available at Our Nursery

BEAUTY BUSH

Kolkwitzia amabilis. A graceful shrub with fine foliage and masses of pink flowers on the slender arching branches.

BUDDLEIA

Butterfly Bush. Long spikes of fragrant flowers on arching branches. A fast growing shrub that will quickly form a screen. It is usually desirable to cut this shrub back severely in the winter. Available in Pink, Wine Red and White.

BARBERRY

Red Leaf Barberry (Berberis thunbergii atropurpurea). Rich lustrous bronzy-red foliage and brilliant red berries. Dense bushy shrub best in full sun.

FORSYTHIA

Lynwood Gold. A spectacular new Forsythia which bears masses of much larger blooms than older varieties. Brilliant branches.

HYDRANGEA

Otaksa (Hortensis). Forms a rounded shrub 3 to 5 feet high covered in early summer with large trusses of pink or blue flowers. Blue results from keeping soil acid. Sweet soil keeps them pink. 2 yr. plants \$2.25

Pee Gee (Paniculata grandiflora). A vigorous shrub which bears its huge panicles of light blooms in August and September. Available in both tree and bush form. (Tree form) 3-4' \$3.95

DAPHNE

Daphne mezereum, February Daphne. Upright stems heavily set with fragrant rosy-purple blooms in later winter, followed by showy red berries in fall. 12-15" \$3.45, 15-18" \$4.45

HYDRANGEA

FLOWERING QUINCE

A low to medium height shrub with interesting branching habit and masses of blooms on the otherwise bare stems in late winter and early spring. Excellent in flower arrangements and beautiful espaliered against a wall. The new varieties we offer bloom while quite young and come in many colors such as pink, white, red and apple blossom.

Apple Blossom, Crimson King

LILACS

We stock the French Hybrid Lilaes in a number of fine varieties including all the popular colors. There are many outstanding single lilacs available as well as the doubles. Lilacs should be planted in full sun in a slightly alkaline soil.

2-3' \$2.95 and up

DWARF EUROPEAN CRANBERRY

Viburnum opulus nanum. 2-2½ ft. tall, compact, deep green foliage overcast rosy pink. Will grow in any soil in either sun or shade. 9-12" \$2.75

SPIRAEA

Anthony Waterer. Low growing, rather dense bushes sprinkled all summer long with flat heads of deep rose blooms. 15-18" \$1.50

Thunbergi. A dainty, graceful shrub with slender arching branches which are covered in spring with tiny white flowers. Bright green feathery foliage.

Van Houttei. A robust favorite with arching branches loaded with heads of white flowers in spring. Excellent where an informal flowering hedge is desired.

BEAUTY BUSH

DECIDUOUS Flowering SHRUBS

MOCK
ORANGE

FLOWERING
QUINCE

FORSYTHIA

MOCKORANGE

Virginale. Upright shrub with large white fragrant blooms in late spring and early summer.

Minnesota Snowflake. Similar to Virginale except has a mass of tiny white blossoms in spring. (Patented).

SNOWBALL

Viburnum carlesii. Round heads of fragrant light pink flowers in early spring. An especially choice shrub that should be in every garden. 3 to 4 ft. high.
9-12" \$2.95, 12-15" \$3.95

Viburnum tomentosum. Sweeping horizontal branches wreathed in spring with flat clusters of snowy white flowers followed by clusters of red berries. Attractive neat foliage. Singularly decorative.
18-24" \$2.50

WEIGELA

Eva Rathke. Deep green foliage and masses of ruby red trumpet shaped flowers in spring and early summer.

Weigela rosea. Taller, with masses of light pink flowers in spring and early summer.

SNOWBALL

WEIGELA

LANDSCAPING WITH camellias

KUMASAKA

ALBA PLENA

COLONEL FIREY

Camellias are prized in Northwest gardens for their habit of blooming in late winter and early spring, and their glossy evergreen foliage which is attractive the year around. All have lovely blooms which find many uses in corsages and flower arrangements. Camellias make beautiful hedge plantings and also as separations between house and service yard as well as lovely outlying yard planting. Camellias are also beautiful when planted along fences. By choosing early, medium, and late flowering varieties, camellias can be planned to give beautiful blooms from fall through spring. We will be happy to assist in your choice of varieties. Another interesting and new way to use these versatile plants is to train them in espalier form along fences and the sides of the patio. With the proper care they will become not only beautiful specimens but will provide superb evergreen foliage the year around.

12-15" \$2.95, 18-24" \$4.95

Alba Plena. Finest of all white Camellias. Fully double flowers often 6 inches across. Lovely and delicate.

C. M. Wilson. A beautiful blush pink sport of Chandleri Elegans. A new and outstanding variety.

Colonel Firey. Perhaps the finest red Camellia. The glowing crimson blooms, of flat and symmetrical form, are often 6 inches across.

Debutante. One of the finest new varieties with beautiful fully double ball shaped flowers of a delicate shade of pink. Ideal as a corsage flower.

Grandiflora Rosea. One of the finest deep pink semi-double camellias. From salmon-rose to bright deep pink. Very large with a column of stamens in the center. Vigorous, spreading bush with large shining deep green pointed foliage.

Herme. Delightfully fragrant flowers 5 to 6 inches across. Semi-double, petals broad, large, light pink with an irregular border of white around each.

Julia Drayton. Huge flowers, often 7 inches across, are uniformly brilliant scarlet, beautifully veined. Double with high pointed center.

Kumasaka. Very large double salmon pink blooms late in the season.

Monjisue Variegated. Cherry red marbled white, medium rose form.

Wakanoura Red. Large slightly cupped semi-double blooms of rich red color.

SASANQUA CAMELLIAS

Sasanquas thrive in full sun or a partially shaded area and may be used as hedges, ground cover, vines or specimens. Care and culture of the Sasanqua is identical to that of the Japonica. Its hardiness, profusion of bloom from fall through spring and the dark evergreen foliage make it most desirable. The single forms are especially beautiful and ideal to train in espalier form.

We Have Specimen Plants of Many Fine Camellias — Please Inquire

JEAN M.
De MONTAGUE

CYNTHIA

BETTY WORMALD

Rhododendrons evergreen - colorful

15-18" \$7.95, 18-24" \$12.50.

Cynthia. One of the most brilliantly colored Rhododendrons. The rosy carmine blooms are carried in large shapely trusses.

Eureka Maid. Deep rich pink blooms carried in large conical trusses. Excellent compact growth.

Jan Dekens. Huge trusses of deep pink open fringed blooms. Attractive large deep green wavy leaves. Compact plant.

Mars. A wonderful dark true red with tight compact trusses that bloom in late May. Large dark green leaves. Grows up to 6 feet high. Extremely hardy.

Mrs. A. T. De La Mare. Enormous trusses of white flowers with a green spot on the upper petal. Strong grower. Good foliage.

Sappho. Perfect trusses of large glistening white flowers with deep purple blotch. Very striking. Tall grower.

Vulcan. Another hybrid which reflects good breeding and has performed admirably for us in cold weather. A medium compact shrub with dark green pointed leaves and numerous rounded trusses of bright red flowers.

Brittania. Bright crimson blooms in large clusters.

Blue Peter. Large but tidy trusses of lavender blue flowers touched with purple on the upper petals. Excellent foliage. Spreading habit.

Earl of Athlone. Tight trusses of red blooms. A high ranking variety with good foliage and blooming habits.

Goldsworth Yellow. Very free flowering and compact. One of the finest types. The flowers are a beautiful apricot color.

Jean Marie de Montague. Attractive foliage and trusses of bright crimson blooms on a well shaped bush. Excellent foliage.

Purple Splendor. Rich deep royal purple. The finest of this color in existence.

DWARF VARIETIES

6-8" \$3.95, 10-12" \$5.95

Blue Tit. An outstanding hybrid of dense low growth, rarely exceeding 3 feet in height. The numerous light blue flowers appear in early April. The plants are most effective when planted in groups and allowed to form a solid mass. This variety makes an admirable small informal planting.

Unique. Tidy trusses of deep cream flowers, flushed apricot are borne on the neat rounded bushes.

Care and Planting of Rhododendrons, Heathers, Azaleas, other Broadleaf Evergreens

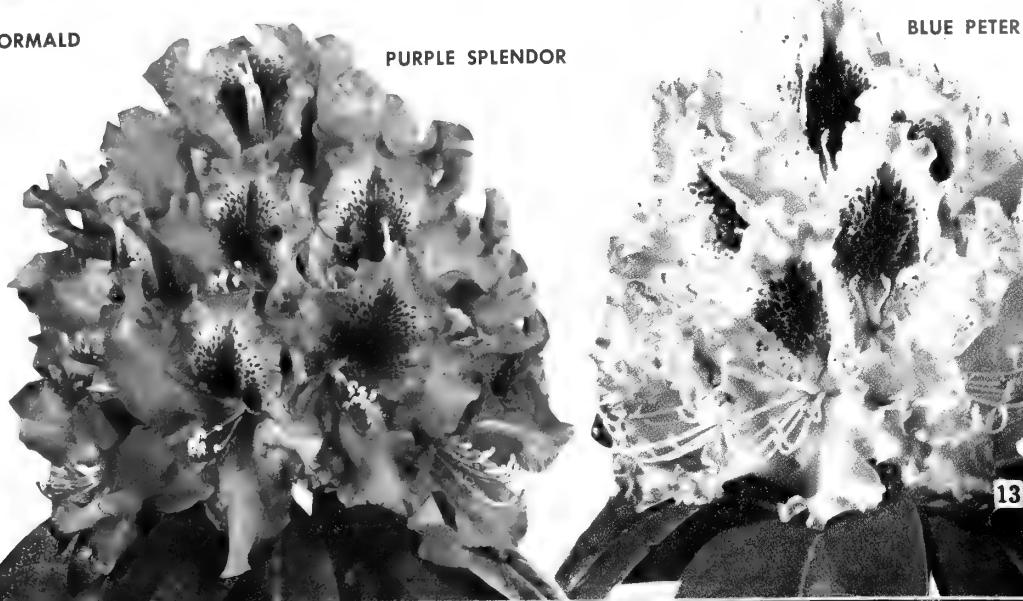

Rhododendrons and Azaleas prefer an acid soil, well drained, loose and friable. A generous application of peat moss and leaf mold should be worked thoroughly into the soil. When the soil is very stiff and heavy it should be replaced with good top soil. Shot clay, sandy loam, or peaty soil are all suitable for this purpose.

To plant dig a hole considerably larger than the root ball. Fill in the bottom of the hole with a mixture of equal parts of loam and peat moss. Then place the plant in the hole so that the top of the root ball is not more than 1 inch below the level of the surrounding soil. Fill in the sides with the same mixture, firming it down well to avoid air pockets.

After planting soak the soil thoroughly. Mulch the ground around the plants with an ample layer of peat, leaf mold, sawdust or other porous substance.

Rhododendrons and Azaleas require ample moisture. Water frequently during dry weather and during warm weather. An overhead sprinkling morning and evening will be beneficial.

The ideal site for Rhododendrons and Azaleas is one that provides some protection from the hottest sun and severe winds.

TAMARIX JUNIPER

AZALEAS

Abundance of bloom, brilliancy of color and attractive habit of growth all combine to make Azaleas ideal shrubs for Northwest gardens. They revel in our acid soil and each spring burst forth in a blaze of color unrivaled by anything else in the garden. The lower growing evergreen kinds may be used for edgings or in broad masses, while the taller deciduous sorts are especially suited for interplanting with evergreen shrubs.

EVERGREEN

6-8" \$2.45, 8-10" \$2.95

Coral Bells. Dainty pink blooms on plants of compact yet graceful habit. The blossoms are semi-double or Hose-in-Hose type.

Hinodegiri. Compact plants with dense masses of brilliant red blooms in early spring.

Sherwood Red. Compact shrub with gorgeous red blooms in early spring. Hardy and very showy.

Snow. Masses of semi-double flowers, pure glistening white.

Ward's Ruby. New; without question the finest of all red azaleas; a gorgeous and brilliant mass of ruby red flowers.

GABLE HYBRIDS

This new strain of Azaleas is the hardiest of the evergreen type. They will live in temperatures down to -10 degrees. They bloom in late April and May. Available colors are soft purple, pearl pink and salmon pink.

GLENDALE HYBRIDS

6-8" \$2.95, 8-10" \$3.45

This group of new Azaleas is excellent for use in partial shade or full sun. Colors are clear and bloom ranges for 2 to 3 weeks in May. Many colors are available ranging from white through deep red.

DECIDUOUS

10-12" \$2.95, 15-18" \$3.95

Altaclarensis. A vigorous grower with masses of bright orange-yellow blooms in May.

Mollis. Perhaps the most popular of all. The blooms, in various shades of yellow, orange and pink, appear before the leaves. Be sure to find room for at least one group of these in your garden.

AZALEA MOLLIS

CONIFERS

The conifers listed here are all evergreen and all have either needle-like or scale-like leaves, and most all have cones for fruit, except Junipers and Yews, which bear berries. All forms and shapes are available from low spreading Junipers, formal little Arborvitae, through medium sized shrubs to very large trees. They are a hardy lot, thriving practically everywhere.

ARBORVITAE

Berckman's Golden Arborvitae. Popular dwarf golden variety. Tips of the branches bright golden yellow throughout most of the year.

9-12" \$3.45, 12-15" \$4.95

Pyramidal arborvitae. Fragrant foliage arranged on fan shaped branches. Makes an impressive tall column. Especially effective when planted as a hedge.

3-4' \$5.95, 5-6' \$7.95

CYPRESS

Elwoodi Cypress. Slow and dense growing, this is one of the finest evergreen shrubs available. It is always neat in appearance and the plump soft evergreen foliage is attractive the year around.

15-18" \$3.95, 18-24" \$4.95

Stewart's or Golden Cypress. A dense symmetrical, pyramidal tree that keeps its golden color well in all seasons. Covered with lustrous rich foliage right down to the ground.

24-30" \$5.95, 30-36" \$6.95

Golden Thread Branch Cypress. Pendulous thread-like branches with bright golden foliage give this conifer its name and highly individual character. Makes a well filled plant that never lacks interest.

12-15" \$4.95, 15-18" \$5.95

CEDAR

Deodar Cedar, Cedrus deodara. Shapely graceful tree with light green foliage. The tips of the branches droop in a charming fashion. Becomes large tree.

3-4' \$6.95, 4-5' \$7.95

JUNIPER

Pfitzer's Juniper, Blue or Gold Compacta. Bushy wide spreading shrub with horizontal branches. Will reach a height of 4 or 5 feet with a 6 or 7 foot spread. Fine rich foliage.

12-15" \$4.45, 18-24" \$5.95

Tamarix Juniper. Spreads close to the ground where it makes a low mat of silvery blue green foliage. Refined shrub for foundation planting, banks or ground cover.

9-12" \$3.95, 12-15" \$4.95

Meyer's Juniper. Silver blue foliage tinted violet in winter. A slow growing conifer of marked distinction.

12-15" \$4.45, 15-18" \$4.95,

Juniper Hetzi Glauca. Rapid, upright, spreading growth in shades of steel blue.

15-18" \$4.45, 18-24" \$4.95

Waukegan. A new prostrate form seldom becoming over 8 inches high. Deep blue foliage assumes a rich purplish hue during winter months.

12-15" \$4.45, 15-18" \$5.45

Savin Juniper. Low and many branched. Ideal for foundation or border planting. The densely covered branches are upright and slightly spreading.

12-15" \$3.95, 15-18" \$4.95

PINE

Mugho Pine. Low dense mounds of upright stems thickly set with longish needles. A slow grower ideal for foundation plantings and particularly effective on rockwork. This choice conifer gives a very interesting texture and should be considered whenever conifers are indicated.

9-12" \$3.95, 12-15" \$4.95

SPRUCE

Colorado. Ample foliage of rich blue-green coloring. Plant very symmetrical. Lovely as a lawn specimen.

18-24" \$5.95, 30-36" \$9.50

YEW

Choice evergreens sometimes adorned with red berries.

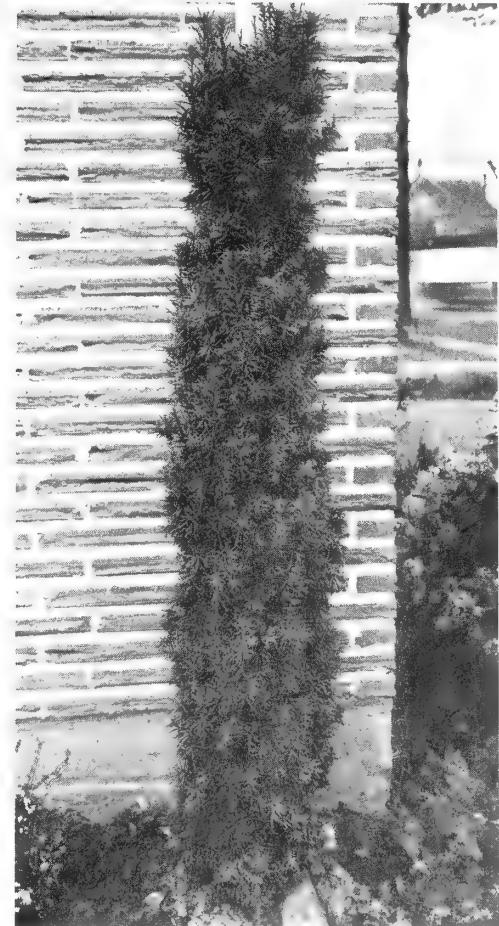

English Yew. The famous Yew of England. Dark green foliage. Available: Upright and spreading.

Upright, 24-30" \$6.95

Spreading, 18-24" \$5.95

Irish Yew. Narrow columns of beautiful foliage. Slow upright growth. An excellent plant for accents. Available in green and golden.

18-24" \$5.95, 3-4' \$8.50

IRISH YEW

FRUIT TREES for your Home Orchard

A selection of fruit trees will add a great deal to the pleasure and utility of the home garden. Besides the undoubted advantage of having your own fresh fruit, picked at just the right time for peak flavor, your fruit trees will provide shade throughout the summer months and in the spring the fragrance and beauty of the blossoms come as an extra dividend.

APPLES

Summer Varieties

Yellow Transparent. A pale yellow apple with mild tender flesh. The standard early apple. July.
Gravenstein. Red striped crisp, juicy apple highly prized for pies and as an eating apple. August and September.
Red Gravenstein. Bright red, juicy flesh, excellent flavor, good shipper and desirable.

Fall Varieties

King. Large yellowish green fruits striped with red. A favorite for baking and eating uncooked.
McIntosh. Medium size; red, white flesh, tender, juicy. Productive. Very hardy. November to February. Probably the finest flavored of all apples.

Winter Varieties

Jonathan. Medium to large, almost round, brilliant red striped with carmine. Crisp white juicy flesh.
Northern Spy. Large greenish yellow fruits with red stripes. A favorite for cooking and eating. Keeps well.
Red Delicious. Strong red waxy skin; delicious flavor, large crisp and juicy. One of the finest red apples.
Red Rome Beauty. Large round long stemmed fruits of beautiful red coloring. Flavor and quality far above average. Excellent keeper.
Stayman Winesap. Improved type of Winesap, larger and more prolific. Large, yellow splashed with red. Tart, crisp, fine for eating.
Yellow Delicious. Large, golden yellow, crisp, firm and delicious. A fine apple for all purposes. Yellow Delicious is a good pollinator and makes a good addition to any home apple planting.

CRAB APPLE

Dolga. Truly a fruiting variety, yet one of the most attractive when in bloom with rosy pink blossoms fading to white, followed by highly colored deep red fruit fully as ornamental as the blossoms. Fruit is highly prized for jelly making.
Red Siberian. Bears abundantly from August to September, starting when still young. Fruit is an inch in diameter.

APRICOT

Perfection. Large, well flavored fruits. A heavy producer and the best all around Apricot. Requires a pollinator.
Moorpark. One of the largest Apricots. Color deep apricot. Flesh firm, juicy and parting from the pit, pleasant, sweet flavor.

CHERRIES

Sweet Cherries

Bing. Large, delicious, dark red, with rich, firm, purplish flesh. Excellent for eating, canning and preserves.
Lambert. Large dark red fruits of superior texture and flavor. Small seeded.
Royal Anne. Large sweet light yellow fruits with red cheek. Solid, richly flavored. Excellent for canning.
Van Cherry. A new Canadian introduction. Giant black cherries ripening shortly after Bing. Good home or commercial variety. Highly crack resistant. Pollenizer.

Sour or Pie Cherry

Montmorency. The leading pie Cherry. Produces a good crop of large, red, well flavored red fruits every year. Crops heavily and bears while young.

PEACHES

Red Haven. A new early yellow freestone peach of medium size. Attractive fruit with firm flesh. A home canning peach of high quality.
Rochester. Sweet juicy flavorful fruits, rich orange and yellowish color.
Veteran. Large round golden yellow fruits with good sweet flavor. Excellent for canning and freezing.
Improved Early Elberta. The most used canning peach. The rich yellow fruits, heavily flushed pink, are borne in great abundance.

PEARS

Summer Pears

Bartlett. Large smooth waxy yellow fruit with white sweet flesh. Plant with an Anjou pear for a pollinator.
Clapp's Favorite. Large fruit with fine, grainless texture. Pale lemon yellow with slight blush. Tree hardy, productive.

Winter Pears

Anjou (Buerre d'Anjou). Fine large fruits with sprightly flavor and buttery texture.

PLUMS

Peach Plum. An old favorite with large round early ripening fruits. Flavor rich and lively.

Yellow Egg. Large long oval fruit of clear golden yellow. Skin thin; flesh golden yellow, juicy and firm.

PRUNES

Italian. Purple oval fruits with sweet juicy flesh of distinctive flavor. The favorite prune in our area. Six or more plants less 10% except Strawberries. This applies to your total fruit order.

COMBINATION FRUIT TREES

Grafted with three or more varieties on one tree these are especially valuable for the small yard. These trees are a constant source of interest and make very desirable shade trees.

Dwarf: 3 varieties \$6.95, 4 varieties \$7.95

Standard: 3 varieties \$4.95,
4 varieties \$5.95

SMALL FRUITS

GRAPES

2-yr. No. 1 plants 75c
Island Belle, Campbell's Early. Large clusters of black berries with a blue bloom. An extra good keeper and very popular with the home gardener.
Concord. A sweet richly flavored black grape. One of the most widely grown grapes in America. Fine for juice and jelly.

Frederonia. Medium sized compact clusters of sweet juicy black berries. Ripens about two weeks ahead of Concord.

BLUEBERRIES

Now one of the most popular small fruits in this region. Delight in acid soil and abundant moisture. Plant about 4 feet apart and to insure pollination plant at least two varieties.

2-yr. old \$1.50, 3-yr. old \$2.00

Dixi. Large-sized fruit, fine blue color, firm, productive and good dessert quality. 25c higher

Jersey. Large sized berries, very sweet. Vigorous bush.

Stanley. A late mid-season variety. The plants are vigorous with large shiny leaves and very productive. Fruits are large and of very fine flavor.

Other varieties available.

BOYSENBERRY

Huge black berries of pleasing flavor. Bears heavily over a long season, even while plants are young.

50c, 10 for \$4.45

BLACKBERRY

Cascade. A cross of the Loganberry and the true wild blackberry. Excellent for jellies, jams and pies.

50c, 10 for \$4.45

Thornless evergreen blackberry.

60c, 10 for \$5.45

THORNLESS LOGANBERRY

A very productive Loganberry. Distinctive flavor. 60c, 10 for \$5.45

GOOSEBERRY and CURRANT

Gooseberry. A favorite for pies and preserves. 50c, 10 for \$4.45

Currant. Clusters of beautiful red berries. Highly esteemed for jellies. 50c, 10 for \$4.45

RASPBERRIES

Canby. A new thornless variety. The bright medium red color of the fruit gives it a superior appearance. The color is retained after picking, which, combined with its firmness, makes it an ideal shipping, market and freezing berry. 50c, 10 for \$4.45

Washington. Our choice for the finest red raspberry. Big crops ripen in June. 35c, 1 doz. \$3.50

STRAWBERRIES

Northwest. The new yellows resistant Marshall strain strawberry produces large flavorful fruits similar to Marshall. 25 for \$1.50, 100 for \$4.75

Marshall. High quality home canning and commercial variety. Fine for dessert, canning or freezing. 25 for \$1.50, 100 for \$4.75

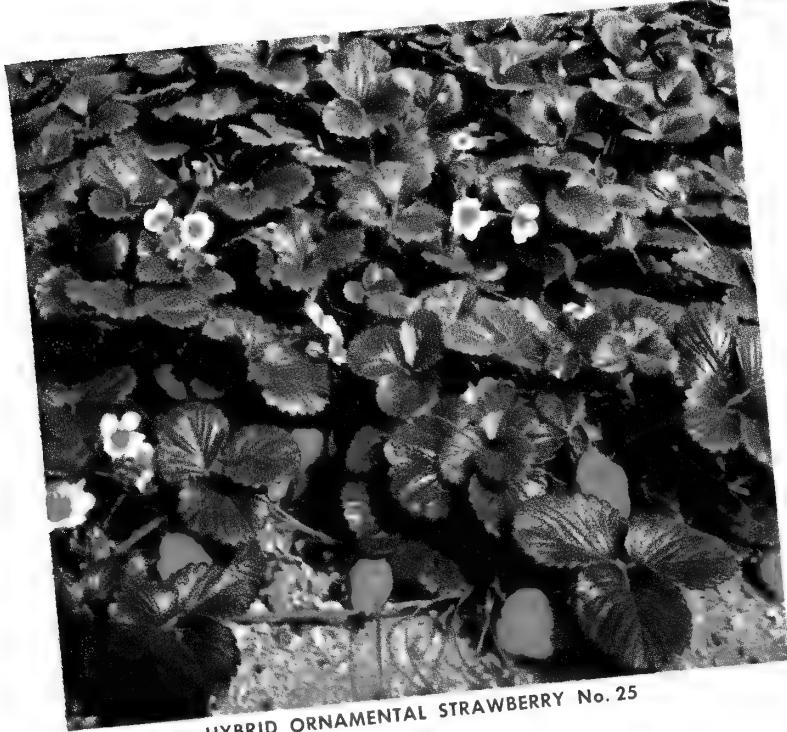

Red Rich (Pat. 993). A true everbearer with the biggest, reddest, sweetest fruits you ever saw. Perfect for freezing. Bears from spring right through summer and into fall. 25 for \$5.00, 100 for \$15.00

Rockhill (Everbearing). Bears young and over a long season. Very productive of its sweet rich-red-berries. Doesn't make runners. 25 for \$3.00, 100 for \$10.00

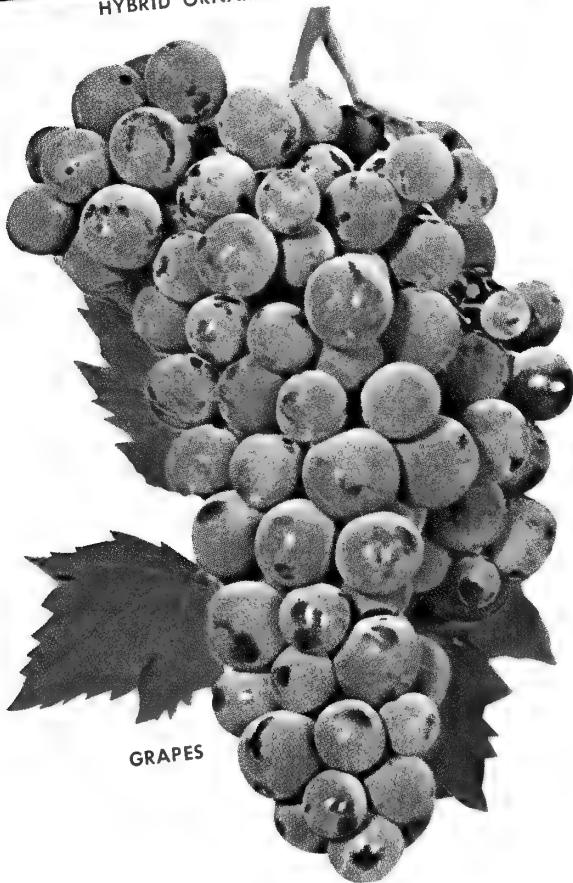

NECTARBERRY

Similar to the Boysenberry but sweeter and deeper in color. Vigorous and productive. 50c, 10 for \$4.45

APPLE

HOW TO PLANT

Balled Trees and Shrubs

Balled plants should be handled by lifting the ball and not the top.

Dig a hole large enough to hold ball and permit firming the earth around it. Place plant with top of ball even with the surface of the ground. Do not remove burlap. Fill in about $\frac{1}{3}$ with soil, then cut top string and fold back corners of burlap. Fill the hole with water and, when soaked in, throw in the remainder of the soil. Firm the soil well, leave a shallow basin and fill again with water. Water again to assure thorough soaking of the ball. Do not rely on sprinklers or sprinkling system to do this until plant is well established.

Use care in placing fertilizer of any kind in the hole when planting. Small quantities of fertilizer may be applied when plants are thoroughly established and growing.

Canned Trees and Shrubs

When plants are in cans, they may be removed by cutting down two sides of the can with tin snips or chisel and pulling the sides apart so that the can comes off easily. Handle so as not to break open the ball of earth.

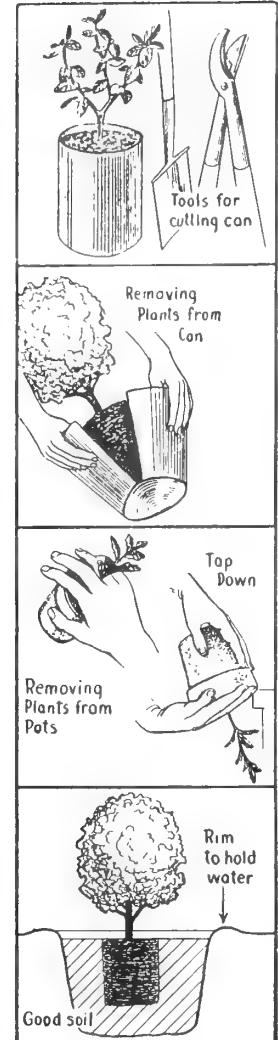

Pots may be removed by the following method: Place four fingers against the surface of the soil, invert the pot, tap lightly against something solid and out come the contents in your hand in one solid piece.

In every case, the soil in the container should be fairly moist so that it will hold together and care should be used to keep all the earth possible on the roots.

For plants in gallons and 6-inch pots, dig a hole approximately 15 inches by 15 inches. For plants in 5-gallon or 9-inch pots, dig a hole approximately 24" x 24".

In all cases, plants should be planted in the ground at about the same level as they were in the container.

After the hole is partially filled, use water generously before filling the hole with top soil so that the water will settle the soil and eliminate all air pockets.

KAY LeverSpray

The modern hose nozzle for sprinkling lawns and gardens, car washing, etc. Just squeeze — it's on! — from a soft spray to a jet stream. Release lever for instant shut-off. Can be locked in any stream position. Saves water. Chrome finish. **K100 — \$1.49.**

KAY LeverSpray

Hose Nozzle & Water Control Valve

Has threaded tip to attach fertilizer jar, siphon, wands, car wash brush and other standard hose devices. Squeeze-release lever action controls water flow. Gives instant shut-off when you want it. Saves steps to faucet. Chrome finish. **K200 — \$1.95.**

GUMFINGER Rubber Rake

An efficient and safe tool for raking leaves, grass clipping and debris from lawns, flower beds and shrubbery. For spreading peat moss and top dressing. Flexible rubber teeth will not dig up roots or harm plants. Lightweight. Lasts for years.

Widths..... 16", \$2.69; 20", \$2.95

Handy Speedy PLANT TIE TWIST-EMS

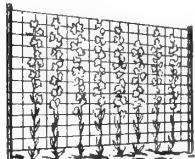

A Twist of the Wrist Gives Permanent Support

Strong dark green "invisible" waterproof tapes with wire reinforcing, which make a positive lock that can't come undone. Protects stems, gives speedy, permanent support to annuals, perennials, vines, shrubs, vegetables.

200 4" long 25c; 100 8" long 25c
100 16" long 50c; Continuous roll \$1.00

Guaranteed by Good Housekeeping

SYFONeX
BRASS SIPHON MIXER

Applies soluble fertilizers, weed and pest-control chemicals accurately mixed and automatically as you sprinkle.

Guaranteed by Good Housekeeping

Can be attached to faucet, between hose lengths or behind nozzle. Siphons chemical concentrate from separate container and mixes 1 part to 16 of water while sprinkling. Assures safe, easy feeding and care of lawns, gardens without danger of burn-outs. Precision made of corrosion-proof brass. Stainless steel check valve.

Individually boxed, \$2.50 ea.

DIVIDENDS ON ROSES

For the amount of care they need, few plants give a bigger return to the gardener than roses.

They may be used for bedding and border effect, tree effects, as climbers, or as spot specimens in the general landscape picture.

Choose an open area for your rose planting, whether it be a bed or a single specimen or small group. By "open area" is meant a spot that gets at least half a day of sunlight, preferably in the morning and early afternoon. It also means a location where there is good air circulation. Poor air circulation is one of the basic promoters of mildew and other fungous diseases in roses.

Good drainage and neutral soil—neither very acid nor very alkaline—are the roses' preference.

When you bring your rose bushes home, plan to immerse them completely in a tub or barrel of water overnight so that they will thoroughly fill their tissues with moisture.

Prune off damaged or insignificant twiggy stems, and damaged roots.

Meanwhile the holes into which the roses are to go should be dug about two feet deep and wide enough to accommodate the spread of the roots naturally.

At the bottom of the hole, build in the center, a cone-shaped mound of earth on which the base is to rest. Make sure that when the plant is set on the cone that the bud union, which is the knob where the rose was budded into the understock, will be slightly above the level of the ground surface. Raise or cut down the cone to meet this condition.

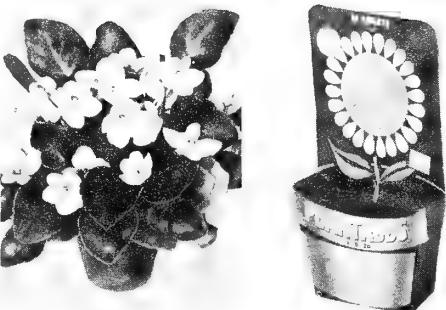

Seat the rose on the mound and spread out the roots on all sides naturally, so that they will lie at an angle of about 30 degrees

from the center. Fill in with earth, puddle around the roots and get the plant firmly seated and build around the above-ground stem structure, a mound of moist earth sufficient to protect the stems from evaporation in the wind.

In about 10 days or two weeks begin scraping lightly away from the stems and if growth has begun to break, level the mound down so that the plant stands with the bud union just above the ground level.

Scrape a shallow ring trench around the plant at about the outer limit of the root spread underground, sprinkle in fertilizer, water and cover.

Feed Plants to Beauty with PLANTABBS

Plantabbs is the complete food tablet for plants, flowers, vegetables. Plantabbs are tiny, clean, odorless tablets. Push tablet in soil once weekly. Normal watering dissolves tablet, providing all vital food elements. World's largest-selling plant food tablet for over 30 years.

19c, 39c, 59c, \$1.00 and \$3.50

HAYES SPRAY GUNS

Hayes Garden Sprayers. For insecticides, fungicides, crab grass killers, fly, ant, and termite control. Six models from 1½ gal. to 12 gal. capacities.

A Hayes 6. Sprays 6 gal. with one loading. Positive on-and-off control valve. \$9.95.

ROSES

The established prices for all No. 1 top quality patented roses are the same throughout the entire United States. This is done to assure you of getting the exact rose you purchase and of the finest quality. The patented roses are the newer introductions which are highly perfected to give you beautiful blooms with the least effort. The prices are governed by the All-America Rose Selections committee and are designed to compensate the growers for the vast research they have accomplished to produce, for you, the finest roses possible.

PATENTED BUSH ROSES

RED

Charles Mallerin (Pat. 933). A big deep velvety crimson rose that keeps its color. Richly fragrant, high centered blooms with 30 to 40 petals. \$2.50.

Chrysler Imperial (Pat. 1167). Vivid rich tones of crimson to glowing ox-blood red. Long tapering buds. \$2.50

New Yorker (Pat. 823). Clear, large, sparkling red flowers, at least 6 inches across, and how beautiful! Fragrant. \$2.25.

President Eisenhower (Pat. 1217). The large, ovoid buds of this new rose open to 4 to 5 inch blooms of rich, unfading, rose-red of lasting brilliance, singly on strong stems. \$2.25.

ORANGE

Fred Edmunds (Pat. 731). Burnt orange blended with rose, gold and salmon shades. \$2.00.

Mojave (Pat. 1176). Radiant orange, highlighted by flame-like tones of scarlet and vermillion. \$2.75.

PINK

Charlotte Armstrong (Pat. 455). Long, pointed buds of clear cerise-pink, opening to neatly tailored flowers. \$2.25.

First Love (Pat. 921). Long, slender bud and pastel shades of delicate pale orchid and rose dawn-pink. \$2.25.

Helen Traubel (Pat. 1028). The color varies with the weather from a light, sparkling pink to a luminous apricot. The magnificent buds are unusually large and long. \$2.50.

Tiffany (P.A.F.). Extremely large blooms and vigorous growth. The buds are long, pointed, golden yellow at the base, shading to a deep pink. The flowers open to perfectly formed, double, high centered blooms with petals of heavy texture and exceptional lasting qualities. \$2.50.

YELLOW

Burnaby (Pat. 1314). Classic 4 to 6 inch empire yellow blooms. Delicate fragrance and last well as a cut flower. Good exhibition rose. Tall grower (4½ feet) . . . Flower is large. \$2.50.

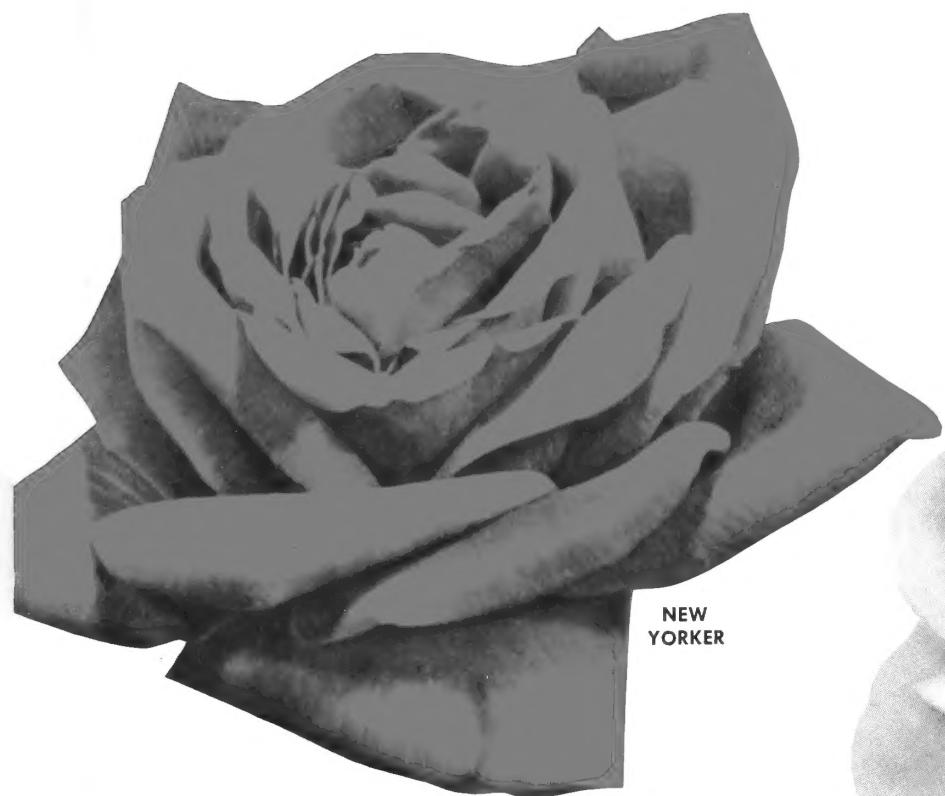

Peace (Pat. 591). Often a clear pleasing yellow, sometimes only yellow at the base, fading to a lighter tint and a delicate pink where the petals turn over. \$2.50.

Sun Valley (Pat. 1135). Warm, rich, radiant yellow flowers hold their tone in open blooms for days without fading. \$2.50.

WHITE

Sleigh Bells (Pat. 1004). Freely produced long ovoid buds opening gradually into large size blooms of gleaming white with a trace of cool primrose at the base. Fragrant. \$2.00.

Roses

FINEST ROSES FOR THE FINEST GARDENS

MULTICOLOR

Forty-niner (Pat. 792). Brightly colored vivid red petals with yellow on outside. \$2.25.

Mme. Henri Guillot (Pat. 337). Beautiful reddish orange with undertone of gold, opening to rich, deep pink. \$2.00.

Saturnia (Pat. 349). Petals cardinal red; salmon, yellow and copper reverse. \$1.75.

TREE ROSES or "standard" roses are much in demand for accent planting and for those who prefer their roses up high where they can be seen without bending over. They are the regular roses budded on straight clean stems of another variety. Keep all suckers cut off at the base of the cane and once a year thin out and shorten the head. Tree roses will add much to the interest and beauty of your garden. We stock a good selection in the most popular varieties.

GRANDIFLORA — A New Class of Roses

This new class of roses has been created to distinguish varieties which are hybrids between Hybrid Tea roses and Floribundas. They are intermediate in blooming habit and in size of bloom between the two types. Free blooming and carefree for massive displays.

Buccaneer (Pat. 1119). Large urn-shaped buds and double blooms of clear lemon-yellow. The foliage is dark and leathery. \$2.50.

Carrousel (Pat. 1066). Dark red velvety blooms which resist bluing. Free blooming. Mildew resistant. \$2.00.

Montezuma (Pat. 1383). A striking new grandiflora with vivid scarlet-orange buds and large salmon-orange blooms in abundance. Vigorous. \$2.75.

Queen Elizabeth (Pat. 1259). 1955 All-America. A superb, delicate pure pink. The subtle blending of soft carmine and dawn pink is majestically set off by the deep green glossy foliage which clothes the vigorous bush right down to the ground. \$2.50.

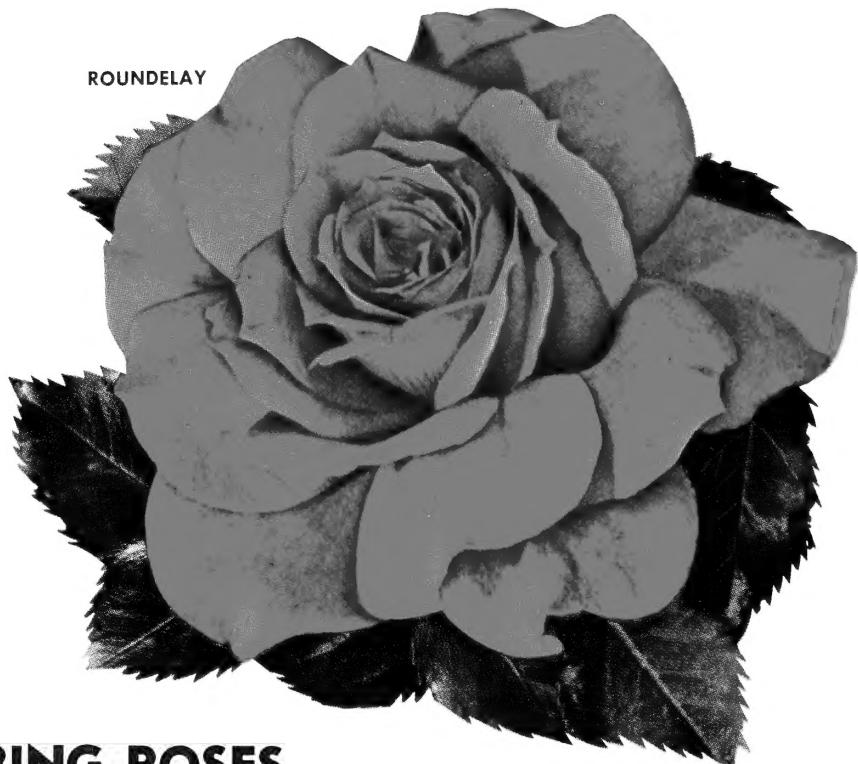

Roundelay (P.A.F.). The delightful penetrating fragrance and excellent habit of growth make this one of the finest of the Grandiflora roses. It is a vivid red blooming in clusters on stout stems long enough to be perfect for cutting. \$2.50.

PEACE
AARS

...Roses

CLIMBING ROSES

Beautiful subjects to train against walls or trellises or allowed to clamber over rough fences. They have been traditionally used on arbors and pergolas where the bloom can be seen at a distance and easily examined close by. Cut out old wood after blooming, thus encouraging new vigorous growth from the base. This will bloom the next season.

\$1.50 each, except as noted.

Cl. Crimson Glory (Pat. 736). The most famous of all red roses. \$2.50.

Cl. Golden Showers (P.A.F.). A versatile new Pillar and Climbing Rose which is winning many admirers. The deep yellow buds are exquisitely shaped and are handsomely long pointed. The fragrant blooms are deep yellow on long stems. \$3.00.

High Noon (Pat. 704). Pillar rose to 8 feet high, covered with long stemmed golden yellow buds. \$2.50.

Cl. Peace (Pat. 932). A sport of the bush rose Peace with all its vigor and beauty and lots more of those magnificent big blooms. \$2.25.

Improved Paul's Scarlet (Blaze). Semi-double blossoms of vivid scarlet borne in clusters.

Cl. Picture (Pat. 524). Clear rose-pink with tones of warm salmon showing thru. \$2.25.

Cl. Pinkie (Pat. 1076). Lovely pale pink. Blooms continuously spring to fall. \$2.75.

Roses . . .

FLORIBUNDA and POLYANTHA ROSES

Polyantha and Floribunda roses are cluster-flowered roses of bushy habit, blooming profusely over a long season. Invaluable for mass display of color. The Polyantha roses are lower growing. The Floribundas usually show more of the characteristics of the hybrid tea in the shape of the bloom and often in the foliage. Use them on banks, edgings, along driveways and walks, in front of the taller roses wherever a mass of color is desired. Floribundas are increasingly popular for patio decoration when planted in tubs.

 **Fashion** (Pat. 789). A new color-rich salmon-orange. \$2.00.

 **Pinkie** (Pat. 712). Bushy 15 to 20 inch plants carry many slender pink buds opening to double 2 inch fragrant pink blooms. \$1.75.

 **Circus** (Pat. 1382). The only All-America Selections Award Winner for 1956. This new multicolored floribunda promises to be a real attraction in your garden for a long time. The predominant color is yellow but Circus, being a true multicolor, will display shades of orange, scarlet, buff and apple blossom pink. \$2.50.

 **Jiminy Cricket** (P.A.F.). All-America Selections award for 1955. Masses of tangerine red buds open to a sharp coral orange or vermillion in the bloom and finish a pink coral. \$2.00.

 **Vogue** (Pat. 926). A unique brilliant cherry coral. Rich, spicy fragrance all through the season. \$2.00.

Goldilocks (Pat. 672). Masses of golden yellow flowers all summer. \$1.50.

Corcorico (Pat. 1193). Three-inch blooms of blazing red, semi-double blooms with 5 to 9 broad velvety petals. Blooms continuously in well formed clusters. Bushy, upright 3-foot plants with good leathery, healthy foliage. \$2.00.

Fanfare (Pat. 1385). Coral orange blooms with intriguing glints of yellow, flashes of orange, and a finishing flush of pastel pink. Free-blooming, compact bush and big, glossy leaves. \$2.00.

Pinocchio (Pat. 484). Clusters of dainty little flowers — salmon-orange flushed with gold. \$1.75.

Spartan (Pat. 1357). One of the best of the new floribundas. Vibrant coral or burnt orange buds opening to Hugh high centered blooms. Simply a mass of color over the long flowering season. \$2.75.

White Bouquet (Pat. 1415). An enchanting new floribunda with sparkling 4 to 5 inch flowers. Foliage is luxuriant dark green, providing a splendid contrasting background for the white blooms. \$2.50.
